## Summary

I'm a Junior Software Developer Student that's eager to pursue his Software Development Career. I take pride in my work and have experience as a team leader although not in the software industry. I work well as an individual and within teams.

Currently I have the most experience in Typescript with both Hooks and Object-orientated programming however I'm more than willing to learn new languages and concepts.

## Education

2020 – Present

Advanced Software Development Certificate

*Focus College – Kelowna, BC*

- Web Development
- Object Orientated Programming
- Relational Database Design
- Project Management
- Upcoming: Cloud Computing

## Skills

- OS: Linux, Windows
- Jira
- Git // GitHub
- Node / Npm
- Typescript
- HTML
- React
- CSS \ SCSS
- MySQL
- Mocha / Chai

# Projects

2020 - Current

The Platform

*College Project – Outlet for Author Publication*

- During this project I discovered I have a passion for Front End web development. For every line of code I wrote, I am learning very quickly and often thinking of methods to increase the usability of the user interface.
- Proof of concept
- MVP
- Designed & Implemented the Database
- Front End Design & Functionality
- REST API
- React Hooks // Recoil // Typescript // MySQL

2020-2020

Gerald's Contracting Calculator

*College Project – CLI Lumber Requirement Calculator*

- Using a Command Line Interface, our mock client Gerald can quickly calculate the amount of lumber required to build a basic house with specific dimensions. During the introductory phase of the course, we were to display our knowledge of programming fundamentals.
- Documentation / Markdown
- CLI // Yargs
- Mocha // Chai
